SPECIALISED BUILDS : INDUSTRIAL PROJECTS
AGRICULTURAL EQUIPMENT : GENERAL ENGINEERING

NEWSLETTER & COMPANY UPDATE

Lyndon Engineering & Harrows Ltd

January 2016

Southern Fielddays

Lyndon Engineering & Harrows will be in Waimumu at Site 166. We will have a range of harrows for end users to look at, be giving free advice and promote those resellers who continue to support Lyndon Harrows. We will also have an engineering focus with one of our clients (Pitstop Furniture) displaying their Lyndon Engineering designed & built covered race-car trailer. Pitstop Furniture will be offering the 'discerning petrol-head' their racecar-inspired furniture, which looks fantastic!

New products (arena, landscape, viticulture)

We have final trials taking place now for our Arena/Landscape harrow. The Lyndon designed product will offer ease of use and greatly improved flexibility for differing surfaces that it is designed for including sand, clay & soil surfaces. We will send out a brochure with prices and reseller discount details in the near future.

We also have under development an aerator for the viticulture industry. This aerator will be used between the vines to enhance root strength, and be optioned with a liquid fertilizer delivery system that penetrates through the top pasture layer.

Marketing

Our team will finish up the new harrow product videos this quarter. These will be available on-line and we hope they will further enhance end-user knowledge to assist our dealers in more sales for their businesses across the country.

Special Dealer Offers

We have one more 14ft wide folding hydraulic frame in stock, which is ready to fit out and paint. This folding frame is controlled by a manual hydraulic pump, so can be towed behind a work truck and comes with LED lights. It can be fitted with the clients choice of harrows. (typically combo or drill harrows). This towable folding frame retails for \$12,275 + gst (plus harrows). We can also fit this frame with a tractor ready hydraulic and hitching system, and paint in the colour of your choice.

Special dealer only price is available (excluding harrows).

Lyndon Hydraulic Frame Harrow –with 4 to 6 metre options available

"We are looking forward to our new product launches in 2016, some detail of which has been included in this newsletter. The 2015 year was more subdued in the new sales area than previous years with more parts being sold. While travelling the country visiting our dealer network we are still seeing a generally positive outlook, so it is important that we keep developing new business relationships and compliment this with new Lyndon products".
